

[hiddn]TM Laptop

Would you sleep tonight if your laptop was stolen?

- Transparent full-disk hardware encryption of all data at rest
- Replaces your original hard drive – operating system independent, no additional drivers required, easy to install, easy to use, affordable and robust
 - Side-mounted (w/included smart card reader)
 - Crate-mounted (w/contactless smart card)
- Two-factor authentication for added security (PIN)
 - All encryption keys and security data stored on a separate, physical smart card – contactless smart card optionally available
- Program and manage your own smart cards using the [hiddn]TM Key Management System
- FIPS Level 3 & Common Criteria EAL4+ full-disk encryption
- Also approved for protection of data classified NATO RESTRICTED
- [hiddn]TM Laptop encompasses the certified and patented [hiddn]TM Crypto Module with an integrated smart card reader and a 1.8” hard disk drive (SSD up to 256GB, HDD up to 128GB), all enclosed in a stylish metal frame
