*) with 2 KeyTokens (Smart Cards) with random generated AES256 keys and excl. VAT (mva) and freight costs

Safeguarding your stored data – anywhere!

The [hiddn]™ USB external storage unit incorporates industry’s highest level of encryption to provide you with the ultimate assurance that all data stored is protected, at all times!

320GB of protected disk storage – sleep well at night knowing your data is secure

Without the dedicated smartcard, no one can access your data, ever!

Easy to use & robust encryption

[hiddn]™’s highly certified and robust encryption combined with high user friendliness make this external hard drive ideal for your everyday data protection needs – simply insert the smartcard and access the protected drive/data, [hiddn]™ takes care of the rest!

Don’t risk unauthorized access to your data!

Why wait for someone to steal your data, or for someone within your organization to lose their external hard drive? Why not protect it with certified, patented, and verified full-disk encryption? Why not get a [hiddn]™ USB to reassure you?

To order your [hiddn]™ USB units, simply complete, sign, scan and email the form to order@hdd.no and we’ll ensure you get protected immediately! For more information, please visit www.hiddn.no/usb/ !
